

Thermodynamic Disc Traps

Models
DT711
DT71S

THERMODYNAMIC DISC TRAPS

The DT711 Series is a line of compact, lightweight, thermodynamic style disc traps designed to efficiently discharge condensate on applications with working pressures up to 711 psi. Available with or without an integral strainer.

- Single moving part
- Wide pressure range
- Rugged design
- Designed to fail open
- Unaffected by freezing
- Easy to check cyclic operation
- Unaffected by water hammer
- Designed for superheat
- NPT ends standard, BSP ends available

THERMODYNAMIC DISC TRAPS
SPECIFICATIONS

- Maximum Pressure Allowable: 711 PSI (49 bar)
- Maximum Operating Back Pressure: at the outlet should not exceed 70% of the inlet pressure
- Minimum Differential Pressure for Satisfactory Operation: 3.5 psi (0,24 bar)
- Maximum Temperature Allowable: 799°F (426°C)

MATERIALS

- Body: ASTM A743 Gr. CA 40
- Disc Cap: ASTM A743 Gr. CA 40
- Strainer Cap: ASTM A743 Gr. CA 40
- Screen: AISI 304
- Disc: AISI 410

APPLICABLE CODES & STANDARDS

End connections per ANSI B1.20.1 for threaded

SAMPLE SPECIFICATION

Steam traps shall be all stainless steel disc type with connections on a common center line, which will operate in any position, Integral seat design with hardened disc and seating surfaces.

RECOMMENDED INSTALLATION

From equipment being drained

DIMENSIONS

Size	A	B	C	D	Wt lb (kg)
3/8"	2.36 (60)	2.44 (62)	1.69 (43)	1.57 (40)	1.4 (0,7)
